

4th Annual Hematology Conference

LEARNING OBJECTIVES

- Identify new oral anticoagulant drugs and determine appropriate use for surgical procedures.
- Determine how and when to utilize new long acting treatment options for hemophilia A.
- Integrate new treatment options for Acute Promyeloid Leukemia (APML) and compare standard of care verses new treatments available.
- Apply new approaches to initial treatment of multiple myeloma and determine the best way to avoid relapse.
- Evaluate and identify targeted therapies for treatment of Chronic Myeloid Leukemia (CML).
- Classify and manage t-cell lymphomas using new drug agents and identify which drug approach to use for each subtype.
